

CUSTOM CASTING

At Foothills Steel Foundry we can manufacture almost any kind of wear part...

Our casting capacity allows us to manufacture, heat-treat and machine ferrous castings from 50g to 9,000kg. Our team of casting and design engineers, metallurgists, CAD operators and machinists makes Foothills Steel a one-stop shop for all your casting needs.

Our wear-resistant Alloys include:

- Manganese Steel
- High Chrome White Iron
- Carbon Steels
- Low Alloy Steels
- Flame Hardened Alloys

Foothills Steel Foundry manufacture world class wear solutions for a variety of industries

Quarry & Aggregate | Mining | Construction | Cement and Concrete | Oil & Gas | General Engineering | Government

We specialise in wear resistant alloy steels, including Manganese, High Chrome and Custom alloys. Our services include custom casting, machining & fabrication facility, custom heat treatment and consultation & design service using the Faro Arm CMM and Solidworks CAD.

Would you like to work with a wear part supplier that delivers on their promise to produce the best wear part solution for your business?
